## Pasta Zen

The idea was to have restaurant which is warm, serious and modern aimed to modern business people who need quick, quality, healthy food and rest of everyday bond in friendly, family atmosphere. During the day is classic restaurant with quick exchange, but during the night is more bar where you can spend time in calm atmosphere in good talk, good food and good wine. Atmosphere is changing with light and loudness of music. In interior the designers used natural materials (wood, stone, plants..) space is refined with small details. Furniture is wooden tables and wooden chairs only finished with oil. In toilets they used wood in combination with prints. This restaurant in short time was established like one of inevitably places in city. This is concept for future, for business areas for modern people.
